

Development Summary Report

Arcado Springs Mixed-Use Community

1. Property Overview

- **Location:** Along Arcado Road, Lilburn, Georgia
 - **Parcel IDs:** 6123 033, 6123 015, 6123 014, and 6123 162
 - **Land Area:** Approximately 9.00 acres
 - **Current Zoning:** Residential (R-1 or equivalent)
 - **Proposed Zoning:** Mixed-use classification per Lilburn Zoning Ordinance Appendix A, Article 7, Section 736 – *Mixed-use developments*
 - **Boundaries:**
 - **North:** Properties fronting Village Green Court & Orange Jungle
 - **South:** Properties fronting King David Drive
 - **Frontage:** Arcado Road
 - **Internal Connectivity:** Proposed via private access drives
 - **Current Conditions:** Limited residential and undeveloped land
-

2. Project Description

According to the **Letter of Intent**, Arcado Springs is planned as a **walkable, service-rich mixed-use development** featuring:

Residential Component

- 104 condominium units (~1,700 sq. ft. each)
- Designed for owner-occupancy, targeting a mix of households seeking low-maintenance living

Commercial Component

- 13 commercial buildings
- Total: 24,400 sq. ft. of retail, service, and office uses
- Placement intended to serve both residents and surrounding neighborhoods

Site Features

- Generous green space and landscaped buffers
- Internal pedestrian walkways and bike lanes
- Strategic easements for park-to-park connectivity
- Parking distributed for both residential and commercial needs

- Site plan shows commercial cluster along Arcado Road frontage with residential positioned to the east
-

3. Zoning Ordinance Compliance

Per the **City of Lilburn Code of Ordinances – Appendix A, Zoning, Article 7, Section 736**, mixed-use developments must:

1. Integrate residential and commercial in a cohesive plan
2. Include pedestrian-oriented design
3. Provide adequate parking and internal circulation
4. Maintain compatibility with surrounding uses
5. Support city’s comprehensive plan and smart growth policies

Arcado Springs meets these requirements through:

- **Integration of Uses:** Condominiums and commercial spaces in proximity
 - **Pedestrian Orientation:** Sidewalks, bike lanes, and greenway linkages
 - **Traffic Management:** Multiple access points to reduce pass-through traffic
 - **Compatibility:** Acts as a transitional buffer between subdivisions and the corridor
 - **Smart Growth Alignment:** Reduces vehicle dependency, expands local amenities
-

4. Community Impact

Economic & Social Benefits

Commercial component expected to generate new employment opportunities for Lilburn residents in retail, service, and office sectors.

Well-planned mixed-use developments tend to increase and stabilize surrounding property values by improving neighborhood amenities.

Onsite green space, bike lanes, and walking trails promote active lifestyles and improve quality of life.

Increased foot traffic and active ground-floor commercial uses can enhance public safety through “eyes on the street” principles.

Condominiums provide a low-maintenance housing option for seniors wishing to downsize but remain in the community as well as new couples that want to stay close to family.

Traffic Considerations

Mixed-use design allows residents to meet daily needs onsite, reducing outbound trips by an estimated 20–30% compared to single-use developments.

Multiple site entrances and internal circulation routes distribute traffic flow, minimizing bottlenecks at any single point.

Dedicated pedestrian crossings and bike lanes will encourage non-vehicular movement within and around the site.

Site is positioned to take advantage of potential local transit stops along Killian Hill Rd, supporting broader regional mobility goals.

Commercial uses are anticipated to generate more off-peak traffic, balancing flow throughout the day rather than concentrating it during rush hours.

School Impact Report

Provide from Mark Kimbrough in the planning department of Gwinnett County Public Schools.

Residential Rezoning Impact on Local Schools Prepared for City of Lilburn, July, 2025											Proposed Zoning
	School	2025-26			2026-27			2027-28			Approximate Student Projections from Proposed Developments
		Forecast	Capacity	+/- Cap.	Forecast	Capacity	+/- Cap.	Forecast	Capacity	+/- Cap.	
	Parkview High School	3148	2,900	248	3,120	2,900	220	3,093	2,900	193	19
Arcado Springs	Trickum Middle School	2203	2,275	-72	2,148	2,275	-127	2,104	2,275	-171	13
	Camp Creek Elementary School	1414	1,325	89	1,400	1,325	75	1,383	1,325	58	25

5. Utilities & Infrastructure

Sewer Capacity

- Sewer Capacity Certification Request submitted to Gwinnett County Water Resources
- Includes flow calculations, tie-in manhole details, and utility plans
- Processing time: minimum 10 business days (20 if additional monitoring required)
- Pump station design to meet minimum rate of 4x AADF if required

Water, Stormwater & Access

- Utility plan will ensure connection to existing infrastructure

- Site grading and drainage to comply with county stormwater regulations

6. Conclusion & Recommendation

Arcado Springs represents a **strategically designed mixed-use project** that aligns with Lilburn's comprehensive plan and mixed-use zoning intent. The development's emphasis on connectivity, local commerce, and green space positions it as a catalyst for neighborhood enhancement.
