

**LETTER OF INTENT**  
**Rezoning Request – Arcado Springs**  
**Submitted to: City of Lilburn Planning & Economic Development Department**  
**Date: 07/29/2025**

To Whom It May Concern,

This Letter of Intent is respectfully submitted on behalf of the applicant in support of a rezoning request for parcels 6123 033, 6123 015, 6123 014, and 6123 162, located along Arcado Road in Lilburn, Georgia. The subject properties currently comprise approximately 9 acres and are proposed to be rezoned from their current residential designation (R-1 or equivalent) to a mixed-use classification that will allow for a thoughtfully planned development known as **Arcado Springs**.

### **Project Overview**

The proposed Arcado Springs development is a mixed-use community that will feature:

- **104 residential condominium units**, each approximately 1,700 square feet in size
- **13 commercial buildings** totaling **24,400 square feet** of retail, service, and office space
- Generous **green space**, internal pedestrian walkways, and **dedicated bike lanes**
- Strategic **easements to interconnect nearby parks and open spaces**, enhancing walkability and recreation access

This development is designed to serve both future residents and the surrounding neighborhoods by creating a walkable, service-rich environment that complements the City of Lilburn's vision for vibrant, connected communities.

### **Justification for Rezoning**

The rezoning is being requested to allow for the integration of residential and commercial uses on the property, consistent with smart growth principles and the City of Lilburn's Comprehensive Land Use Plan. The existing zoning no longer reflects the highest and best use for this land given the area's growth patterns, evolving demographics, and demand for community-serving commercial amenities.

### **Benefits to the Community**

1. **Smart Transition of Use:** The project provides an appropriate transition between existing residential subdivisions and the surrounding corridor by incorporating lower-density residential alongside accessible commercial space.
2. **Reduced Traffic Pressure:** The inclusion of commercial amenities onsite encourages local shopping, reducing the need for vehicle trips outside the community. Internal circulation and multiple access points will help prevent pass-through traffic.

3. **Enhanced Connectivity and Livability:** Residents and neighbors will benefit from expanded sidewalks, bike lanes, and green corridors, including park-to-park connectivity through easements.
4. **Economic and Tax Base Growth:** The project will stimulate local business activity while contributing to the city's tax base through both residential and commercial components.

## **Conclusion**

Arcado Springs is a thoughtfully planned development that addresses the growing demand for mixed-use neighborhoods, supports the City of Lilburn's long-range planning goals, and creates a safe, walkable, and aesthetically cohesive environment. We respectfully request your approval of this rezoning application and look forward to working with city staff and leadership throughout the process.
